

## ***Stabilises resinous woods prior to painting or varnishing.***

### **Purpose**

Liberon Knotting helps to stabilise resinous woods prior to painting or varnishing and also helps to minimise the discolouration of paint finishes.

### **Performance**

- Helps stabilise resinous wood
- Suitable for use on all types of wood
- Ideal for use before painting

### **How to Use**

#### **Preparation**

Ensure the surface is bare, clean, dry and free from dust. If the wood is to be dyed or stained, this must be completed prior to the application of Liberon Knotting.

#### **Application**

Apply one coat only of Liberon Knotting directly on to the knots with a good quality, clean brush. Knotting will be touch dry in 15 minutes but leave to fully dry for a further 2 hours before applying any finishes.

#### **Important**

Always test product on a spare surface or inconspicuous area for colour, compatibility and end result.

Coverage: 1L = 8-16m<sup>2</sup>

Pack Size: 125ml and 250ml

Drying Time: Minimum 2 hours
