

# Spirit Sanding Sealer

***Quickly prepares the surface prior to wax finishes.***

## Purpose

Liberon Spirit Sanding Sealer quickly prepares the surface of bare wood and MDF used for furniture and decorative items prior to wax finishing. It seals the surface so that less wax is needed and its special lubricants ease sanding.

## Performance

- Ideal for sealing wood before waxing
- Suitable for use on all types of new or stripped furniture; including MDF
- Brush or cloth applied
- Ideal for use on turned woodwork

## How to Use

### Preparation

Ensure surfaces are bare, dry and free from dust. If you want to colour the wood apply Liberon Palette Wood Dye before the sealer.

### Application

Shake well before use. Brush on a thin coat of sealer, allow to dry for at least 30 minutes and sand very thoroughly with 240 or 320 grit abrasive paper. Apply a second coat if required and re-sand after a minimum of one hour. Apply Liberon Black Bison Paste Wax using Ultra Fine (0000) Steel Wool to finish.

**Precautions:** For table tops, shelves and other surfaces that require a more durable finish, we recommend the use of Liberon oils or varnish.

**Important:** Always test product first on a spare or inconspicuous area for colour, compatibility and end result. Spirit Sanding Sealer is recommended for wax finishing only.

Coverage: 1L = 6-10m<sup>2</sup> ½

Pack Size: 250ml, 500ml, 2.5L and 5L

Drying Time: 10-30 minutes
