

Ideal for removing dark stains caused by rust, alcohol, damp, ink, ring marks and fruit etc

Purpose

Liberon Wood Bleacher is ideal for removing dark stains caused by rust, alcohol, damp, ink, ring marks and fruit etc. It can also be used to lighten naturally dark wood or natural wood which has darkened through alkali products, staining or weathering.

Performance

- Removes dark stains caused by rust, alcohol or damp
- Lightens naturally dark or damaged wood
- Does not harm the wood
- Ready to use

How to Use

Apply Liberon Wood Bleacher sparingly with a brush. Concentrate on badly affected areas if required. Allow to dry, check results and apply further coats if necessary. Rinse thoroughly with clean water 2-3 times and allow to dry completely before refinishing.

Important: Always test product on a spare or inconspicuous area for colour, compatibility and end result. Water-based products may be affected by Wood Bleacher residue.

Precautions

Wear protective gloves. Due to various types of pigmentation some dyes/stains/woods may resist bleaching. Wood Bleacher relies on chemical reactions - results cannot be guaranteed.

Coverage: 1L = 2-12m²

Pack Size: 125ml, 500ml and 5L

Drying Time: 10-30 minutes
