

Shellac Filler Sticks

Used to repair surfaces prior to French polishing, lacquering or varnishing.

Purpose

Shellac Filler Sticks are the traditional repair sticks for filling holes and cracks prior to French polishing, lacquering and varnishing.

Performance

- For filling holes and cracks in finished and unfinished wood prior to

French polishing

- Sets very hard
- Colours are intermixable
- 3 colour tones per pack

How to Use

Application

Melt stick with a hot iron or soldering iron and run into the damaged area. Allow to harden and remove any excess with a scraper or sharp knife. Lightly sand to a smooth finish.

Important

Always test product on a spare surface or inconspicuous area for colour, compatibility and end result.

Colours: Light, Medium and Dark

Pack Size: 3 pack blister, Tin of 10
