

# Black Patinating Wax

***For adding a coloured finish, or highlighting areas on carved pieces.***

## Purpose

Liberon Black Patinating Wax creates striking effects on all types of material such as metal, wood and plaster. It is ideal for ageing modern furniture and disguising repairs to old and new furniture. It can also be used for adding a coloured finish or highlighting areas on finished pieces such as carvings.

## Performance

- Special effects wax
- Ages modern furniture
- Disguises repairs to old and new furniture
- Fakes grime on picture frames
- Suitable for use on wood, metal, gilt, plaster, tone, MDF and papier mache
- Decorative interior

## How to Use

### Preparation

Ensure the surface is clean, dry and free from any previous finishing materials.

### Application

Wipe onto the surface with a cloth or brush and allow to dry for 2-3 minutes before removing as much or as little of the excess as you wish with a clean lint-free cloth or Liberon Ultra Fine Steel Wool (0000).

To use the wax as a coloured finish on bare wood, work a thin coat into the wood with Ultra Fine Steel Wool (0000), allow to become touch dry and buff.

Once dry the wax may be sealed with Liberon White Polish.

To remove large areas of Special Effect Wax use Liberon Black Bison Paste Wax Neutral and buff. For a water resistant finish use Liberon Finishing Oil applied with a lint-free cloth or Ultra Fine Steel Wool (0000).

### Important

Always test product on a spare surface or inconspicuous area for colour, compatibility and end result.

Colours: Jet Black

Coverage: 250ml = 2-3m<sup>2</sup>

Pack Size: 250ml

Drying Time: 5 minutes
