

Ideal kit for beginners.

Purpose

Liberon Liming Kit enables you to transform an ordinary object or piece of furniture easily with a decorative limed finish. Ideal for beginners the starter pack contains everything you need to achieve a professional looking finish.

Performance

- An ideal starter pack for beginners
- Helps you create beautiful and creative effects on wood
- Ideal for use on oak, ash and mahogany
- Full instruction leaflet included
- Easy to use

How to Use

Preparation

Open the grain of hardwood such as oak with a bronze brush to enhance the effect. On softwood such as pine where there is little grain this step can be missed out. In this case you will be using the actual shape of mouldings rather than the grain to achieve the limed finish. Wipe clean with a tack cloth, a resin coated cloth which attracts dust.

Colouring greatly enhances the contrast between the liming wax and the wood. Use Liberon Palette Wood Dye to colour the wood. Liberon Palette Wood Dyes are available in a range of wood shades. Wipe of the excess dye with a clean cotton cloth and allow to dry thoroughly before liming.

Application

Apply the Liming Wax using Liberon Ultra Fine Steel Wool (0000) working the wax into the grain of the wood. Immediately remove most of the excess with a clean cotton rag. Change cloths once they become clogged up with wax.

Wax polish with the Neutral Black Bison Paste Wax to remove the white haze on the surface and reveal the final finish. For a water resistant finish replace Black Bison with Liberon Finishing Oil.

Finally, allow the Black Bison Paste Wax to become touch dry (approximately 15 minutes) and buff to a soft sheen finish using a furniture brush or cotton cloth.

Important

Always test products on a spare surface or inconspicuous area for colour, compatibility and end results.
