

A dye and wax mixed for a quick application.

Purpose

Liberon Tint and Wax is ideal for decorating, enhancing and protecting interior bare wood such as furniture, doors, panelling and skirting.

Performance

- Dye and wax mixed for a quick application
- Leaves the grain visible
- Easy to apply
- Water based formula
- Low odour
- Usage : Interior

How to Use

Preparation

Ensure the surface is free from existing finishes; wax, oil or grease. Sand thoroughly to a smooth finish and remove the dust.

Application

Shake well before use. Apply evenly on bare wood using a foam applicator or paint brush. Allow to dry for 2 hours, then buff with a cotton cloth or furniture brush. Repeat the process until the desired depth of colour is achieved. Finally buff to improve the shine.

Important

Always test product on a spare surface or inconspicuous area for colour, compatibility and end result.

Cleaning and maintenance

Wipe over with a cloth or duster and re-apply Tint and Wax as required, when surface looks dull and tired. Do not wash with water.

Precautions

- Not suitable for floors or areas where moisture is likely.
- Wear protective gloves as dye and wax are often hard to remove from the skin.
