

# Beeswax Paste Clear

***Ideal for nourishing absorbent woods such as pine and oak.***

## Purpose

Liberon Beeswax is ideal for nourishing absorbent woods such as pine and oak, especially when they are unsealed, or for use on items that have been dipped for stripping. A natural protector of wood it guards against dryness and is particularly suitable for small surfaces and furniture.

## Performance

- Traditional wax that nourishes wood
- Feeds wood and protects against dryness
- Gives an authentic finish
- Ideal for small surfaces and furniture
- Suitable for hard and softwoods
- EN71 Part 3 Approved - Safe for toys
- Approved by the Guild of Master Craftsmen

## How to Use

### Preparation

Remove old waxes and dirt with Liberon Wax and Polish Remover if necessary. Ensure the surface is clean, dry and free from dust.

### Application

Apply a coat of Liberon Beeswax sparingly with a soft, lint-free cotton cloth or Liberon Ultra Fine Steel Wool (grade 0000). Allow to dry for 30 minutes or until touch dry and then buff with a clean cotton cloth, Liberon Wax Polishing Brush or Liberon Drill Brush.

Repeat the operation on new or very dry wood as it may require two or more coats.

For a higher sheen build-up with thin coats of Beeswax, buffing between coats. Buff with a Liberon Furniture Brush or Drill Brush once the last coat has completely dried.

Important: Always test product first on a spare surface or inconspicuous area to check colour, compatibility and end results.

### Cleaning and maintenance

Wipe over with a cloth or duster and re-wax as required, when the surface looks dull and tired. Do not wash with water.

Colours: Clear

Coverage: 150ml = 1-1.5m<sup>2</sup>

Pack Size: 150ml

Drying Time: Minimum 1 hour
