

Liquid Beeswax Clear

Traditional wax that nourishes wood and protects against dryness.

Purpose

Liberon Beeswax Liquid is ideal for nourishing absorbent woods such as pine and oak, especially when they are unsealed, or for use on items that have been dipped for stripping. A natural protector of wood it guards against dryness and is particularly suitable for large and very dry surfaces such as beams, floors, doors and staircases.

Performance

- Traditional wax that nourishes wood and protects against dryness
- Gives an authentic finish
- Ideal for use on large surfaces
- Endorsed by the Guild of Master Craftsmen

How to Use

Preparation

Remove old waxes and dirt with Liberon Wax and Polish Remover if necessary. Ensure the surface is clean, dry and free from dust.

Application

Shake well before use. Apply Liberon Beeswax Liquid with a cloth, brush or spray gun. Allow to become touch dry for a minimum of 1 hour and then buff with a clean cotton cloth, Liberon Wax Polishing Brush or Liberon Drill Brush. Repeat the operation on new or very dry wood as it may require two or more coats.

For a higher sheen build-up with thin coats of wax, buffing between coats. Buff with a Liberon Furniture Brush or Drill Brush once the last coat has completely dried.

Important

Always test product on a spare surface or inconspicuous area for colour, compatibility and end result.

Cleaning and maintenance

Wipe over with a cloth or duster then re-wax as required, when the surface looks dull and tired. Do not wash with water.

Precautions

Not suitable for high water areas such as kitchens and bathrooms. We recommend the use of Liberon oils or varnishes in these areas.

Coverage: 1L = 10-12m²

Pack Size: 500ml

Drying Time: Minimum 1 hour
