

Woodturner's Safety Cloth

For applying and buffing friction polishes and waxes on the lathe.

Purpose

Liberon Woodturner's Safety Cloth can be used to apply and buff most finishing materials. Unlike cloths containing strong threads, the safety cloth will tear rather than become entangled in the chuck, therefore reducing the risk of entrapping the fingers.

Performance

- Ideal for applying and buffing friction polishes and waxes on the lathe
- Highly absorbent
- Material tears when catches

Pack Size: Pack of 3, Pack of 10
