

Woodturner Lathe Polish

Seals and finishes in one.

Purpose

Liberon Woodturners Lathe Polish is ideal for sealing and finishing turned woodwork in one easy step.

Performance

- Seals and finishes whilst the pieces is still on the lathe
- Shellac based polish
- Suitable for use on all turned work

How to Use

Application

Shake well before use. Apply a reasonable coat using a Woodturners Safety Cloth or brush while the lathe is stationary. Allow to dry for 10 minutes and buff at medium to high speed. Apply a second coat if required.

Important

Always test products on a spare surface or in an inconspicuous area for colour, compatibility and end result.

Liberon advice

For a higher shine treat with the Woodturning Stick or Liberon Black Bison Paste Wax.

Coverage: 1L = 8-12m²

Pack Size: 250ml, 500ml

Drying Time: 3-4 hours
