

Woodturning Stick

Helps achieve a highly durable, gloss finish.

Purpose

Liberon Woodturning Stick can be applied either to bare wood or on top of a sealer. It is made from Carnauba wax that is traditionally used by woodturners. Easy to use it has the best qualities of pure Carnauba, ensuring an even distribution of wax on difficult shapes, while reducing the risk of scratching.

Performance

- For obtaining a highly durable gloss finish
- Unique Carnauba wax and resin blend
- Will not scratch or damage even the softest timbers
- Long lasting and hard wearing shine
- Ideal for use on all types of timber

How to Use

Application

First remove all dust with a Liberon Tack Cloth. While the lathe is turning at a medium to high speed apply the stick directly to a well sanded or sealed piece of wood using moderate pressure and moving sideways at a constant rate.

After application buff with a Liberon Woodturner's Safety Cloth or brush. Repeat the procedure as required.

To achieve a higher sheen apply two light coats of Liberon Black Bison Paste Wax, buffing between coats.

Pack Size: 50g loose, 50g BP
