

# Wax Polishing Brush

## Purpose

Liberon Wax Polishing Brush is designed for buffing waxed polishes on bare wood. It is slightly curved in design to help when buffing irregular shapes and has long bristles to buff the open grain on oak or pine beams. It is suitable for use on soft and hard woods and reduces the chance of splintering often caused by cloth buffing.

## Performance

- For buffing waxed polishes on finished surfaces
- Reduces the chance of splintering
- Suitable for use on soft and hard woods
