

# Honing Oil

## Purpose

Liberon Honing Oil is ideal for cleaning and reviving oilstones that have become dirty or clogged with greasy oil. Liberon Honing Oil is specially formulated to clean and lubricate the oilstone while sharpening tools.

## Performance

- Lubricant for tool sharpening on oilstones
- Cleans dirty stones
- Reduces clogging of the stone from metal particles
- Helps to produce sharper tools
- Usage : Interior

## How to Use

### Application

Apply liberally to the oilstone before sharpening tools. Do not allow the oil stone to become dry during sharpening. Wipe stone clean immediately after tool sharpening.

### Important

Only use on flat static oilstones. Do not use on any mechanical sharpening machinery.

### Maintenance

Use regularly to keep your stone and tools in good condition.
