

Paraffin Wax

Purpose

Liberon Paraffin Wax has a variety of uses including sealing the end grain on timber and making furniture polish by mixing with Liberon Purified Beeswax and Carnauba Wax.

Performance

- Ideal for sealing the end grain of newly cut timber
- Lubricates draw runners
- Mix with other waxes to make a wax polish

How to Use

Application

When sealing the end grain gently melt the wax in an old saucepan. Paint the melted wax over the end of large timbers and at least 10 cm up the sides. The end of small timber can be dipped straight into melted wax.

Pack Size: 500g, 1kg
