

Super Wood Glue

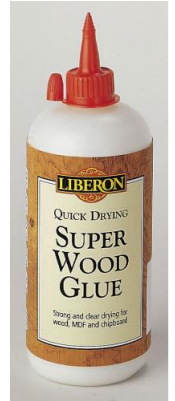

Purpose

Liberon Super Wood Glue is ideal of use on wood, MDF, chipboard and plywood. As it is a clear drying formula it is also suitable for use on leather, cardboard, paper and many other materials.

Performance

- High quality PVA water based wood glue
- Quick drying - 30 minutes
- Ideal for gluing furniture and veneers
- Dries clear
- Suitable for use in furniture restoration
- Usage : Interior

How to Use

Preparation

Ensure the surface is clean, dry and free from dust and grease.

Application

Apply the glue evenly to one of the surfaces. Within 10 minutes press or clamp both surfaces together and allow to dry for at least 30 minutes before handling. Using a damp cloth carefully remove any excess glue immediately after clamping.

Important

Do not allow to freeze. Ensure that the container is tightly closed after use. We recommend that you apply the glue accurately and ensure all excess glue is removed as this may affect the penetration of colour or finishes.

Liberon Advice

For best results use Liberon Super Wood Glue between 10C and 30C. Low ambient working temperatures will prolong the drying time of the glue. The fine tapered nozzle allows accurate glue application to small surface areas.

Coverage: 1L = 8-12m²

Pack Size: 100ml, 500ml, 1L

Drying Time: Minimum 30 minutes
