

Ready-made preparation for sealing surfaces prior to gold or metal leafing.

Purpose

Liberon Gesso is a traditional Gesso preparation that is ready to use as a surface coating prior to gilding, to repair gilt frames, or as a glue to join broken pieces of old gesso or plaster and then fill any missing parts.

Performance

- Ready made
- Seals surfaces prior to gold or metal leafing
- Ideal for repairing damaged or brittle frames
- Traditional formula

How to Use

Preparation

Heat using a bain marie until the Gesso becomes warm and fluid.

Application

Apply successive coats with a brush until required level is reached. Each coat can be applied as soon as the previous one is cold. After a few hours the Gesso will set hard and can then be smoothed carefully with a very fine abrasive.

When using the Gesso with metal leaf wet the Gesso to reactive its adhesive properties prior to laying the metal leaf.

Colours: Red and white

Pack Size: 30ml BP, 250ml
