

Rust Remover

Removes rust and inhibits further oxidation.

Purpose

Liberon Rust Remover deoxidises metal surfaces, removing rust and creating a barrier against oxidation. It is suitable for use on ferrous metals, brass, copper and bronze. It can also be used to degrease and clean most metal surfaces prior to colouring with Liberon Antiquing Fluid, Haematite, Iron Paste or paint.

Performance

- Liquid formulation for removing rust
- Inhibits further oxidation
- Suitable for use on iron, steel and all ferrous metals
- Usage : Interior

How to Use

Preparation

Remove loose rust with a wire brush.

Application

Shake before use. Apply Rust Remover with a brush to the affected area only. Allow the surface to whiten, brush off the white film with a wire brush and repeat the process until no more white deposits appear. Then apply a final coat to inhibit re-oxidation.

Important

Always test product on a spare surface or inconspicuous area for colour compatibility and end result.

Precautions

Always wear rubber gloves and eye protection when using this product.

Pack Size: 125ml, 500ml

Drying Time: Minimum 24 hours
